

Tesla Crypto (TSL) – Whitepaper

Introduction

Tesla Crypto (TSL) is a blockchain-based digital asset built on BNB Smart Chain. It is inspired by clean and sustainable energy principles and aims to deliver transparency, stability, and scalability for secure transactions, staking, and DeFi applications.

Mission

Our mission is to empower the global community with transparent and reliable financial solutions, while promoting clean energy adoption and sustainability.

Token Information

- Name: Tesla Crypto (TSL)
- Symbol: TSL
- Decimals: 18
- Max Total Supply: 1,000,000,000 TSL
- Contract Address: 0x23AeA09aa431e52cE395E4e73e3fF34E544efd0f

Utility

TSL can be used for payments, staking, rewards, and participation in decentralized finance ecosystems. It also supports clean energy initiatives by allocating resources for green energy projects.

Roadmap

1. Token launch and smart contract deployment
2. Listing on BscScan and integration with Trust Wallet
3. Community building and awareness campaigns
4. Partnerships with clean energy initiatives
5. Expansion into global DeFi ecosystems
